

Interaction Designer

Autodesk China Research & Development Center, Shanghai

Hot technology! Cool place to work!

As an Interaction Designer, you will join a highly experienced and creative team that initiates, conceptualizes, and specify features for products in the Civil Infrastructure Industry (<http://www.autodesk.com/civil-infrastructure>). This is a unique opportunity to join a dynamic, fast-paced design and engineering team.

The right candidate must possess a clear passion for solving customer problems. The ability to communicate design ideas to technical audiences through illustration, presentation, specifications and clear descriptive language are all key competencies of this position.

Responsibilities

- Researches and validates clear and achievable specifications for company software products based on user input.
- Translates customers needs into innovative design solutions.
- Optimizes product usability, learnability and customer satisfaction.
- Creates and documents conceptual designs and feature specifications.

Requirements

- A bachelor degree or above in industrial design, multimedia, or HCI-related subject.
- 3+ years experience as an interaction designer.
- Ability to solve complex problems and drive projects from concept to conclusion;
- Portfolio of previous design related work is required.
- Interact with and influence others effectively via teamwork and diplomacy.
- Experience prototyping using Flash, Director, Fireworks, PowerPoint, Visual Studio or similar applications is a plus.
- Knowledge of GIS or CAD competitive products is a strong asset.
- Strong verbal and visual communication skills is required.
- Verbal and written fluency in the English.

A world leader in 2D and 3D design, engineering, and entertainment software, Autodesk is helping design professionals transform challenges into opportunities, design in better ways, and gain competitive advantage.

Autodesk software enables designers to fully experience their ideas virtually so they can design in better ways -- from being more efficient and productive to designing more sustainably and with greater innovation.

- 100 percent of the Fortune 100 use Autodesk products.
- Autodesk has 9 million users worldwide.
- 750,000 companies use our software.
- Our products are available in 20 languages.
- Over the past 14 years, all winners of the Academy Award® for Best Visual Effects in Film used Autodesk Solutions.

To empower our customers with technology that impacts the world, we start by empowering our employees to make a difference: we encourage Autodesk employees to demonstrate their expertise, communicate honestly, and be a bit of a genius. Autodesk employees are free to share opinions and know that they will be respectfully listened to.

Our vision for people at Autodesk is to unleash talent and potential to drive business success. With challenging work, global teams, hands-on training, and robust leadership programs, we make it easy for you to determine where you want to go and how to get there.
