

# Visual Designer

Autodesk China Research & Development Center, Shanghai

Hot technology! Cool place to work!

We are looking for talented visual designers to join a team of highly experienced and creative people at Autodesk. This is a unique opportunity for you to help visualize unique and innovative product concepts with a dynamic, fast-paced and global design team that develops a compelling visual style for our products, including icons, typography, illustrations, graphic devices, dialogs, and other interface elements.

## Responsibilities

- Contribute to evolving visual design standards that reinforce good visual design practices and work within a corporate identity strategy.
- Iconography—develop the symbolic alphabet, syntax, and palette for iconography in the interface.
- Participate in user evaluations of the product interface to identify issues and improve the clarity of the visual communication.
- Track, schedule, plan, and deliver designs in response to requests for visual elements.
- Create high level and detailed storyboards, mockups, and prototypes to effectively communicate interactions and design ideas.

## Desired Knowledge/Skills/Experience:

- Bachelors or professional degree in graphic design or related discipline.
- Verbal and written fluency in the English language and strong verbal and visual communication skills.
- Strong illustration and storyboarding skills.
- Expertise with Adobe PhotoShop and Illustrator.
- A digital portfolio demonstrating superior visual design skills and deliverables for icon and application design.
- Able to work in a user-centered development environment, where all designs are iterated and improved based on usability testing by the team.
- Manage multiple priorities, plan and track work to deliver product on time.
- Interact with and influence others effectively via teamwork and diplomacy.
- 4+ years of practical experience designing icons, graphic layouts in a software application, and other visual communication assets.

A world leader in 2D and 3D design, engineering, and entertainment software, Autodesk is helping design professionals transform challenges into opportunities, design in better ways, and gain competitive advantage.

Autodesk software enables designers to fully experience their ideas virtually so they can design in better ways -- from being more efficient and productive to designing more sustainably and with greater innovation.

- 100 percent of the Fortune 100 use Autodesk products.
- Autodesk has 9 million users worldwide.
- 750,000 companies use our software.
- Our products are available in 20 languages.
- Over the past 14 years, all winners of the Academy Award® for Best Visual Effects in Film used Autodesk Solutions.

To empower our customers with technology that impacts the world, we start by empowering our employees to make a difference: we encourage Autodesk employees to demonstrate their expertise, communicate honestly, and be a bit of a genius. Autodesk employees are free to share opinions and know that they will be respectfully listened to.

Our vision for people at Autodesk is to unleash talent and potential to drive business success. With challenging work, global teams, hands-on training, and robust leadership programs, we make it easy for you to determine where you want to go and how to get there.
